Today, I've shared with Dutch stakeholders how the EC plans to fully embrace Open Science by going beyond open access to both publications and data. OA will still be a key aspect but, in addition, a DMP will be required regardless of whether data is open or closed and Data Management considerations will be evaluated at the proposal level in the next FP.

#openaccess #openscience #data #datamanagement #dmp

## Open (FAIR) data

# Why RDM

- **Internal benefits**

- ☐ Current - effective research design, data collection, analysis and publishing
- ☐ Future – **FAIR** (Findable-Accessible-Interoperable-Reusable) data

- **External benefits**

- ☐ Transparent/open
- ☐ Identified, cited, tracked
- ☐ Reproducible and replicable
- ☐ Meeting international standards
- ☐ Compliant with policies (e.g. funder)

# Policies

- Netherlands Code of Conduct for Research Integrity
- ERIM polices
  - TOP 10 to DO Basic Privacy and Security for Your Data
  - Basic Principles for Responsible Research Data Management
  - Personal Data and Privacy Impact Assessment in Research

# Tools

**DMP**

For Dropbox contact [appman@rsm.nl](mailto:appman@rsm.nl)

For SURFSara contact [rsec@rsm.nl](mailto:rsec@rsm.nl)

# Research Integrity for PhDs

*DM, privacy, ethics*

## Preparation

- Welcome day teaser(s)
- Scientific Integrity course
- Research data management workshop

## 1<sup>st</sup> year assessment

- Research data management plan – prepare, review, submit

## Mid-term evaluation

- Research data management plan – review, re-submit
- Privacy assessment report – if applicable
- Ethical review approval – if applicable

## Research outputs

- Apply FAIR (Findable, Accessible, Interoperable, Reusable) principle
- Be in line with journal policies
- Manage research towards reproducibility
- Strive for open science – open access publishing (RePub), open research data (EUR data repository)
